ABOUT US

HiTeak is the exclusive distributor of premium quality teak garden furniture and accessories manufactured in our family owned factory located in Vietnam. We service our US customers from a warehouse and distribution center in Yorba Linda CA. Customers can purchase our line either out of our warehouse or in containers factory direct. This allows you to choose the best way to manage cost and margin.

STATEMENT

To build a diverse network of wholesale partners who share our goals. We believe sustainable growth will come from providing the US market the highest quality outdoor furniture built to last at a fair price and backing this up with excellent customer service.

OUR FACTORY

Established in 1993, our factory manufactures fine furniture sold throughout Europe, Japan and the United States. The teak timber is purchased globally, always from responsibly harvested forests. We only use timber from the heart of the log from trees more than 30years old. We invest in state of the art machinery and equipment constantly improving both the work environment and the quality of the final product. Our professional team of designers, engineers and quality assurance managers monitor all phases of the manufacturing process, from kiln drying to finishing, packaging and final distribution assuring that product leaving this facility arrives at your customer's door in perfect condition, and built to last many decades.

TEAK : has always been a prized building material and comes from the species known as *tectonis grandis*, native to the tropics. Used in residences of the rich and powerful as early as the 7th century. Teak made its way to Europe by way of the Dutch traders who colonized Indonesia and found teak to be a superior timber in boat building, which is still true today.

Teak is an extremely dense tropical timber with unique properties. It has naturally high levels of oil and silica or rubber locked right into the tight grain of the wood. When dried to a proper moisture content, teak maintains its structural integrity, and resists deterioration caused by weather conditions or other enemies like mold and insects.

No teak is the same. All trees grow in concentric circles outward from the center. So the tree's natural oil is found in more abundance in the center or heart of the tree. The sapwood or outer layers do not have these same robust properties.

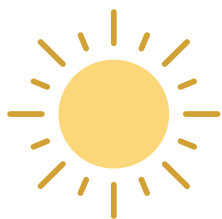

New teak has a natural honey golden color. Left untreated outdoors, exposed to sunlight and air and the honey color will soften to light grey and after several years to a silvery patina, which embodies elegant beauty that improves with age.

Why teak?

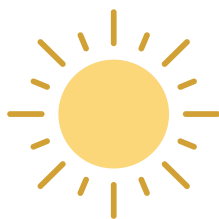

WHY HITEAK : Our teak has been carefully sourced globally only from plantation grown teak trees. We look for trees over 30 years old and cut our components only from the heart of the tree.

Our teak is carefully kiln dried to less than 10%, to eliminate any shrinkage that might affect the structural integrity of the furniture. Traditional furniture joinery is used including dowels and mortise and tenons. All hardware is marine grade stainless steel.

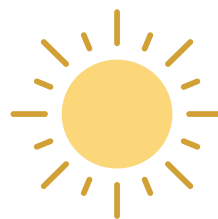

Our teak furniture has been hand-sanded on all sides, and the fit is carefully checked before it is pack for shipping to your customers home.

TEAK CARE

HITEAK furniture will provide decades of service without preservatives or external finishes. Just an occasional cleaning with mild soapy water and a soft brush will remove dirt and surface stains. Do not use harsh detergents. A small amount of bleach can be added to the water to kill bacteria or mold, which may grow in damp climates, and this will not harm the furniture.

How your customer's teak ages is up to them. It can be left with no maintenance at all, and the furniture ages gracefully with no changes to its strength or structural integrity. Some customers prefer to protect or preserve the natural new honey color, and so we offer a range of teak care products.

TEAK CLEANER:

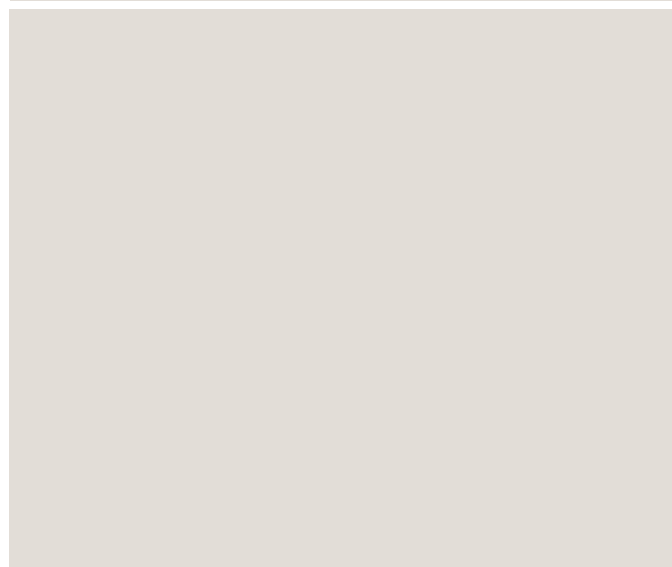

Our teak cleaner is used to clean and restore discolored dark grey teak. Easy to use, it is water based and non-hazardous. Our cleaner high concentration cleaner also includes a brightener, saving a second step in the process.

TEAK PROTECTOR:

Teak protector like teak oil applications are used to maintain the original golden color, but our protector lasts 4 times longer than a teak oil application. Teak oil often causes black spots on teak. Our protector prevents black spots. Unlike teak oil, our protector not greasy and does not stain clothing or patio surfaces. Most teak oils and protectors contain hazardous solvents. Our protector is water-based and solvent- free.
